

SPACE STATION APES

Copywriting + Creative

The Long Of It

Space Station Apes is a confederacy of creatives and copywriters. Together we have smashed whole campaigns, delivered entire content strategies, finely crafted studio scripts, and produced the sort of copy that convinces people to not only buy, but to believe in brands. ouch.

For over 8 years we have been turning words into new worlds, and working with companies just like yours. Companies that are looking to better define their place on the planet.

We talk tech. We speak finance and fashion. We chat media, energy, charity. We do emotive. We do informative. Long form, short form. Love, lust, hype, hurt. We do everything with words you wish you could.

World Mobile

World Mobile are *the* most exciting thing in telecoms right now. On a little hush-hush, they've developed a way to bring everyone online. It's ballsy, and they're backing it.

Space Station Apes built their brand and voice identity from scratch, prepping for some serious strategic partnerships and seed investment.

We produced:

- white papers
- brand guides
- website content
- press releases
- documentation
